SUMMARY

Full Stack Developer with 3.5+ years of experience designing, developing, and maintaining robust web applications. Proven expertise in React, Next.js, Node.js, REST APIs, AWS, and modern micro frontend architectures to improve application performance and user engagement. Proven ability to deliver high-quality software solutions in Agile Scrum environments, with strong problem-solving skills focused on improving application efficiency and architecting scalable data workflows.

TECHNICAL SKILLS

Frontend: ReactJS, Next.js, JavaScript, Tailwind CSS, HTML5, CSS3, Redux, Webpack, Responsive Design

Backend & Databases: Node.js, Python, REST APIs, Microservices, MySQL, PostgreSQL, DynamoDB

Cloud & DevOps: AWS (EC2, Lambda, S3, SQS, SNS, DynamoDB, CloudWatch, IAM, Load Balancing), Git, Docker, Kubernetes, CI/CD

Testing & Architecture: Jest, React Testing Library, System Architecture, Serverless Applications

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Freelance)

Mar 2026 – Jun 2026

MeraDhan

Vellore, India

- Architected and deployed production-ready trading workflows, financial API integrations, and user onboarding flows for a high-performance fintech investment platform built using Next.js, Node.js, and Tailwind CSS.
- Engineered the platform's bond Sell workflow and deployed a robust 24/7 trading availability engine that expanded transaction capabilities.
- Integrated third-party financial REST APIs to stream real-time market data and built state-driven UI flows restricting transactions exclusively to KYC-verified users.
- Enhanced backend search functionality for the Bond Directory and Customer Portal with ISIN-specific searches, fuzzy matching, and improved retrieval performance.

Associate Engineer II

Jul 2023 – Dec 2025

PowerSchool

Bengaluru, India

- Led the development of an AI-powered content creation platform by designing and executing a microfrontend architecture, configuring the Module Federation Plugin in webpack.config.js to define exposed components and efficiently manage shared dependencies (e.g., React and Material UI), reducing content generation time by 40%.
- Architected and launched scalable backend solutions for an internal platform, integrating educational resources into a content management application and improving overall processing efficiency by 30%.
- Built and deployed AI-driven automation features for assignments and quizzes, improving workflow efficiency by 15% and increasing student engagement by 20%.
- Collaborated with cross-functional teams to build scalable frontend and backend features utilising ReactJS and MySQL.
- Participated in Agile Scrum ceremonies, including sprint planning, code reviews, and retrospectives, contributing to high-quality, on-time feature delivery.

Engineering Intern

Sep 2022 – Jun 2023

PowerSchool

Bengaluru, India

- Developed, debugged, and enhanced frontend features for the Schoology learning management system using ReactJS and PHP, improving system stability and user experience.
- Engineered the Search Message feature, reducing average search time by 25% and improving overall application usability.
- Identified and resolved performance-critical issues in a legacy codebase, increasing platform reliability and reducing production issue recurrence by 15%.
- Resolved complex customer technical enquiries, diagnosing and troubleshooting software issues to ensure high client satisfaction.

EDUCATION

M.Tech: Integrated Software Engineering

VIT University | (8.3 CGPA)

May 2023

Vellore, TN
